JD-igital Guide

JD-igital Guide software, powered by RealGUIDE™, allows a simple, predictable and customizable surgical procedure according to the needs of the clinician as well as the patient.

The great advantages of the Computer Guided Surgery are: surgical precision, stress, reduction for the clinician, a less invasive and post.surgery phase for the patient, and predictable aesthetic result.

JD-igital Guide is certified MDR and FDA.

Digital Solutions

JDentalCare offers services and product supporting the clinician's digital workflow.

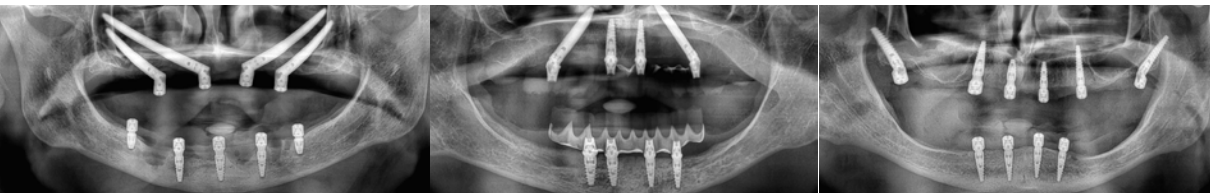

All JD Scanbody and TiBase abutment solutions for intraoral scanning are able to perform an easy and accurate optical impression directly in the patient mouth.

JDentalcare provides, also, open implant libraries for all JD implant lines to guarantee maximum precision and flexibility to the laboratory technicians.

Maxilla-For-All® treatment concept

JDentalCare is specialized in the rehabilitation of severe maxillary atrophy with the Maxilla-for-All® protocol: an innovative treatment that combines the use of pterygoid, nasal, and zygomatic implants in order to rehabilitate 100% of cases of severe atrophy in the maxilla. Maxilla-for-All® is able to significantly reduce the invasiveness and the time of the procedure compared to traditional regenerative techniques. Therefore, this kind of procedure lower costs, both for the clinician and the patient.

Quality e validation

CERTIFIED PROCESSES AND STRICT TESTING FOR LIFETIME SAFETY

JDentalCare complies with the strictest international standards: our products are CE certified and FDA approved and have been registered in more than 60 countries worldwide.

JDentalCare's quality management system is certified by **TÜV SÜD** according to MDSAP.

All dental implant systems are tested in accordance with ISO 14801, in order to simulate masticatory loads and ensure lifetime safety.

JDentalCare Education

JDENTALCARE IS THE IDEAL TRAINING PARTNER FOR DENTAL PROFESSIONALS

The JDentalCare training program includes trainings on basic implantology, full arch restorations techniques, as well as theoretical and practical courses on the most advanced surgical procedures in dental implantology (e.g. pterygoid, trans-sinus and zygomatic procedures).

JDentalCare lectures are only held by selected speakers of international standing.

JDentalCare Training Center

A WIDE RANGE OF THEORETICAL, PRACTICAL AND LIVE STREAMING COURSES

The JDentalCare Training Center is located inside the company's headquarters, in Modena, Italy.

It is a multifunctional area of more than 600m², equipped with 3 training rooms, including one hands on room for practical courses.

During the years, the training center hosts a large number of local and international courses. Don't miss the opportunity to join us and discover the new frontiers in dental implantology!
